Pages : 384

ISBN : 9783131546913

Price : \$100.00

Description

Praise for this book:

This is a welcome pocket reference for veterinarians who have already completed acupuncture training, but are not yet proficient in the location or use of all the points. -- **Lorrie Hale-Mitchell, DVM, University of Illinois College of Veterinary Medicine**

Skillfully integrating traditional concepts of Chinese medicine with clinical experience and modern scientific research, *Acupuncture for Dogs and Cats* brings together all current information in one convenient book. Its atlas-style format, highlighted by hundreds of full-color photographs and supporting text, makes it ideal as a quick, user-friendly reference in the clinic or training program.

Special Features:

- ▶ An easy-to-use, double-page spread designed for fast retrieval of information--on the left, concise text describes the effects, indications, localization, technique, and depth of insertion for each acupuncture point; on the right, high-quality photographs demonstrate all concepts
- ▶ Bones and muscles have been precisely drawn into each photograph, a valuable tool for localization of points
- ▶ A comprehensive discussion of all acupuncture points in all channels ensures that you have full mastery of the field
- ▶ A complete introduction to the principles of traditional Chinese medicine (TCM), channel systems, TCM diagnostics, point selection, and point categories (such as Ting or Luo points) provide a strong foundation in the concepts of veterinary TCM

The only book to focus solely on acupuncture for small animals, this handy, pocket-size atlas is unique in the field. It offers a wealth of practical knowledge and a pictorial reference for veterinarians, animal acupuncturists, students, and trainees whose goal is to provide the highest level of treatment to the animals in their care.
