

Seminars in Hearing

Volume : 39

ISSN : 0734-0451

Price : 18,900

Description

Seminars in Hearing is a quarterly review journal that publishes topic-specific issues in the field of audiology including areas such as hearing loss, auditory disorders and psychoacoustics.

The journal presents the latest clinical data, new screening and assessment techniques, along with suggestions for improving patient care in a concise and readable forum. Technological advances with regards to new auditory devices are also featured.

The journal's content is an ideal reference for both the practicing audiologist as well as an excellent educational tool for students who require the latest information on emerging techniques and areas of interest in the field.

2019 Topics Include:

Novel Approaches to Fostering Hearing Loss Self-Management in Adults

Guest Editor - Michelle L. Arnold, Au.D.
