Description

The definitive resource on leading-edge hair transplantation techniques from global experts!

This sixth edition of Hair Transplantation, edited by renowned surgeons Robin Unger and Ronald Shapiro and with contributions from innovators worldwide, builds on its longstanding reputation as the one trusted, unbiased, and acclaimed educational resource for state-of-the-art hair restoration techniques. Comprehensively updated with all the latest advances, the sixth edition includes full discussion of the pros and cons of various surgical and nonsurgical approaches, controversies, and evidence-based clinical pearls gleaned through hands-on expertise. It also covers important practice management topics such as proper training, instrumentation, and medico-legal issues.

A new section featuring 23 chapters dedicated to follicular unit extraction (FUE) covers the considerable improvements realized since the previous edition, including options for multiphasic automation, improved punch designs, and advanced instrumentation. Other additions to the text detail the expanded use of sharp and dull implanters for atraumatic hair graft placement, scalp micro-pigmentation (SMP), improved holding solutions, emerging cell and regenerative therapies, and much more.
